ROKELY'S

SMALL FRUIT PLANTS

PREMIER,
BEST EARLY

J. N. Rokely & Son
Bridgman, Michigan

GREETINGS

TO OUR FRIENDS AND CUSTOMERS:

We are proud to present our 15th annual catalog—the largest and best we have ever sent out.

During our 1925 shipping season we filled more orders and shipped more plants

than we ever had in any one season previously. This increased patronage of both old and new customers has enabled us to branch out and we are now offering a much larger and more complete line of nursery stock than ever before. All our stock must conform to the same high standard we have maintained in grading our plants in the past and we invite your consideration of our new offerings.

It has been our constant endeavor to build our reputation on Square Dealing and Quality Plants at Reasonable Prices. We believe in Square

Dealing not only because it pays in dollars and cents, but because it is the only foundation upon which a

J. N. Rokely

A. J. Rokely

lasting and satisfactory business can be built. The many letters we receive from both new and old customers each year praising our plants and business methods, testify that we are building upon this firm foundation. We pledge ourselves to a continuance of this policy.

Our soil here is a rich, sandy loam, peculiarly adapted to plant growth and all kinds of plants are grown here to a perfection that is seldom attained in other sections of the country. Plants grown on this soil develop a wonderful root system and possess the stamina and hardness to withstand transfer to other soils and climatic conditions. That is why we are able to furnish plants equal to any, and superior to many, offered at much higher prices.

In writing this catalog we have endeavored to give clear, concise descriptions of varieties as we have found them, carefully avoiding exaggeration or painting of extravagant pictures to attract attention. When ordering from us you know everything will be exactly as represented. Furthermore, we both live here on the farm and are actively engaged in this business. Every order receives our personal attention both in office and packing house and in case of error or complaint we are here ready and glad to make adjustment to your complete satisfaction if we are in any way at fault.

While we have always urged the policy of early ordering, we wish to especially emphasize it this year. Extremely dry weather shortly after planting time seriously injured new plantings with the result that there are prospects of an acute shortage of nursery stock over the country. We fill all orders as long as stock holds out but we know we are going to run short on a good many items. Only a small deposit is required to book your order, so why wait?

We hope to receive your order again this spring, and with best wishes for a prosperous 1926, we remain, very truly yours,

J. N. ROKELY & SON.

OUR GUARANTEE

We guarantee all nursery stock sold by us to be first class, true to name, and free from injurious disease. Any stock proving otherwise will be replaced by us or purchase price will be promptly refunded upon receipt of proper proof. We further guarantee safe delivery of your order by express or parcel post. It is mutually agreed, however, that in no case shall we be held responsible for more than the actual price paid for the plants. All complaints must be made within five days after receipt of shipment, except complaint of untruthness to name, or such complaints will not be given consideration.

We wish it fully understood that we do not guarantee continued growth of any nursery stock sold by us. The welfare of plants, trees, and shrubs is entirely dependent upon care, weather conditions, and other matters entirely beyond our control. Our liability, except as above noted, ends upon delivery of good live stock—the rest is up to you.

A Field of Coopers Three Months After Planting

QUALITY PLANTS AT LOW PRICES

In order to make a success of fruit growing it is most essential that good plants be obtained. Quality should always be the first consideration, as poor plants are not cheap at any price, but cost is a very important factor and one that deters many from beginning. We are happy to say that we have solved this problem for our customers and for fourteen years have been selling them first quality plants at prices much less than the average.

Many wonder how we are able to produce and sell our plants at such low prices. Our answer is—first, our plants are grown on a specially suitable rich, sandy loam soil, giving an enormous yield of first quality plants with a minimum of labor, which means lower cost per thousand than the average, for growing; second, we employ no expensive agents—this catalog is our only salesman; third, we make a smaller and less elaborate outlay in advertising and thus eliminate to a great extent the largest single item in the production and sale of our plants; fourth, we are satisfied with a reasonable profit and are striving to “Live and Let Live.”

In other words—rich soil, efficient management, low overhead expense, and reasonable profit combine to give you Quality Plants at Low Prices.

AN INDEPENDENT CONCERN

We are an independent firm and are in no way connected with any other nursery or group of nurseries here at Bridgman, or elsewhere. As always, we are prepared to give the best in Quality and Service at prices below others.

Rokely's Nursery is the oldest firm doing business here at Bridgman under its original name and by the original owners.

STATE DEPARTMENT OF AGRICULTURE

L. WHITNEY WATKINS, COMMISSIONER.

CERTIFICATE OF NURSERY INSPECTION

No. 4246

This is to certify, that the nursery stock of J. N. Rokley & Son, Bridgman, Michigan, has been examined and found apparently free from dangerous insects and dangerously contagious tree and plant diseases.

This certificate to be void after July 31, 1926.

BUREAU OF AGRICULTURAL INDUSTRY

A. C. Carton, Director.

Lansing, Michigan, October 9, 1925.

L. R. Taft, Chief Horticulturist.

STRAWBERRIES

All strawberry blossoms are of two kinds, either staminate (Perfect) or pistillate (Imperfect). The pistillate varieties must have some staminate variety planted every third or fourth row to fertilize their imperfect blossoms so they may produce fruit. There seems to be a mistaken idea among some fruit growers that staminate varieties must have pistillate varieties planted with them in order to produce fruit. This is not so. Staminate varieties will do equally well when planted alone.

In the following descriptions we have marked staminate varieties (S) and the pistillate varieties (P).

EARLY VARIETY

PREMIER (S)—An extra early variety that has earned a nation wide popularity within the last few years. It is adapted to all soils and climates and is without doubt one of the best varieties grown. Ripens over a long season and produces loads of large slightly pointed berries, of a bright red color to the center. Is firm and a good shipper. The plants are large, long rooted and good drought resisters. The foliage is tall and heavy and beautiful dark green in color. You should certainly plant the Premier this year.

Gibson Strawberries

MIDSEASON VARIETIES

BUN SPECIAL (S)—We have had the opportunity of observing this new variety since its introduction and are convinced that it is one of the best varieties introduced within the last few years. The berries are a deep red clear to the center, have an excellent flavor, are evenly shaped and of large size, and present a beautiful appearance when packed for shipment. Plants are vigorous and prolific growers, making extra heavy picking rows. Order some this spring for a trial.

COOPER (S)—A recent introduction of undoubted merit. After a thorough test in our own fields we can recommend it highly to growers desiring an extra large and showy market berry. This variety makes a wonderfully thrifty growth of foliage, the plants standing erect and presenting a beautiful appearance on account of their great size. The fruit stems, which are protected by the foliage, are very stocky and erect and set an exceptionally heavy crop of berries. The berries are the largest we have ever seen, being two or three times as large as ordinary varieties, and have a rich, luscious flavor all their own. Commence ripening in midseason bearing an enormous crop of fruit. Berries ripen evenly without green tips.

Cooper Strawberry, Wonderfully Thrifty

DR. BURRILL (S)—This variety which is known as "The Million Dollar Strawberry," was originated by Dr. Reasoner, of Urbana, Illinois, who originated the famous Senator Dunlap. Dr. Burrill resembles the Senator Dunlap very closely and is claimed by the originator to be a scientific cross between the Senator Dunlap and Crescent. It is a heavy producer of large, uniformly shaped berries, bright glossy red in color with bright yellow seeds and green calyx. The fruit is beautiful in appearance and commands a high price on any market. It is of excellent quality and very firm. The plants are strong and vigorous and the foliage a beautiful dark green in color. We recommend the Dr. Burrill for either home garden or commercial growing.

Eaton Strawberries

EATON (S)—Another recent introduction that is becoming very popular over the country. The plant is medium large in size and is a nice clean, thrifty grower. Foliage has a tendency to be upright, holding the fruit from the ground, which is a desirable feature. Berries are deep red in color, conical in shape, and of great size, holding their shape and size well until the end of the season. Fruit is firm and will stand much rough handling, making it an excellent shipper. We recommend the Eaton as a valuable market or home garden variety.

GIBSON (S)—Our Best Strawberry. As a money maker we know the Gibson has no superior and we are sure it has no equal. The fruit growers of this section—the famous Michigan Fruit Belt—plant them almost exclusively for a commercial crop and for home use and canning. The Gibson berry is a beautiful dark red, clear to the center, of excellent quality and flavor, firm, and will stand

shipping as well as any variety we know. The plants yield an enormous crop of fruit, beginning to ripen with the Senator Dunlap and continuing over a long period. Unlike most varieties the Gibson does not become small during the last pickings but retain their large size and good quality to the last berry. The plants are long rooted and will withstand much dry weather. The foliage is very rank, affording protection for the blossoms and fruit, and is dark green in color. The fruit stems are large and strong. The plants propagate freely and will make nice heavy picking rows. We cannot recommend this splendid variety too highly and urge you to plant heavily of Gibson.

GLEN MARY (S)—Plants are large and long rooted with abundance of upright glossy green foliage. Will do well on any soil and is a popular midseason variety. Berries are large, dark red with prominent yellow seeds. Meat rich and juicy with good flavor. Firm and a good shipper, commanding high prices on any market.

Rokely Root System

Pistillate

Staminate

Senator Dunlap Strawberries

SENATOR DUNLAP (S)—The Senator Dunlap is the most popular strawberry in the United States and we sell more plants of this variety every season than we do of all the other varieties together. The plants are medium in size, hardy, long rooted, very prolific, and will hold their own under most any rough and tumble methods of cultivation. If allowed to grow unrestricted they will cover the ground with a mat of vines but for best results they should be kept down to a good sized fruiting row. The fruit is of good size, and regular in shape and a beautiful dark red to the center. Very firm and of excellent quality. Strong staminate blossoms and makes an excellent fertilizer for pistillate varieties. We consider this variety as being second only to the Gibson and recommend it very highly.

LATE VARIETIES

AROMA (S)—The leading standard variety in sections of this country. Vigorous grower and very productive. Quality good. Berries large bright, glossy red to the center, and with a bright green cap which increases the beauty and selling price of the fruit. Flavor is richly aromatic. The berries are very firm and will carry to market in excellent condition.

SAMPLE (P)—The berries are a perfect strawberry type, bright red in color, uniformly large in size, delicious in flavor and very attractive in appearance. The Sample is very productive and is firm enough to ship well. A heavy plant maker and the plants are large, thrifty, and very hardy. A favorite for both home use and market. The Aroma makes a good fertilizer to plant with the Sample.

WM. BELT (S)—This valuable variety is at its best in the middle and northern states. The berries are very large and the first ones to ripen are inclined to be irregular or coxcombed in shape. The later berries are uniformly conical. Their excellent flavor combined with their beautiful appearance make them one of our best late varieties and we recommend them highly. The plants are vigorous and thrifty, making just enough runners for a good fruiting row.

EVERBEARING STRAWBERRIES

The Everbearing varieties are all strongly staminate and may be used to fertilize pistillate varieties.

PROGRESSIVE—The first successful Everbearing variety to be introduced and is grown more extensively than any other Everbearing variety. It is a sure cropper from spring until snow flies. The plants are large, long rooted, and great drought resisters. The foliage is spreading, healthy and vigorous. The berries are medium large, uniformly conical in shape, and a beautiful dark red clear to the center. In flavor they surpass any June variety. They are excellent for serving fresh from the vines and for canning and preserving they divide honors only with the Warfield. The Progressive is one of the first strawberries to ripen in the spring and the last to ripen in the fall. They fruit heavily and bring practically every berry to full size and maturity. The fall crop sells readily at from 30 to 40 cents per quart. The many dependable qualities of the Progressive make it the ideal variety for home use or market. Our stock of Progressive plants is very limited this year and we urge you to place your order as early as possible.

CHAMPION—A new Everbearing variety which very closely resembles Progressive. In manner of growth it is identical with the Progressive except that the fruit stems are more erect and less hidden by the foliage. It also makes more runners than the Progressive. It will produce more berries and of a trifle larger size than Progressive and equals this variety in quality and flavor. We feel sure the added productiveness and extra plant making qualities of the Champion will make this variety the more profitable.

Champion Strawberries

RASPBERRIES

Our Raspberry fields have been inspected twice by the state inspector during the past summer and pronounced free from disease both times. We can, therefore, supply you with the most healthy plants. Ohio and New York growers please note that we have complied with the quarantine provisions of your states and you may feel perfectly free to order from us.

RED VARIETIES

EARLY KING—We recommend this variety as the best early red raspberry grown. It is extremely early and enormously productive of large, firm, bright red berries. The berries are very attractive in appearance, easy to pick, and unlike other varieties, will not turn dark if allowed to become over-ripe. They are excellent shippers and will bring the top market price. The canes are hardy and thrifty and the plant practically immune from disease. The Early King is rapidly becoming the leading variety of red raspberry in all parts of the country, as it is well adapted to all soils and climatic conditions. Here in Berrien County, where at least three-fourths of the country's raspberries are grown, nine out of every ten fields is planted to Early King. We have a first class stock of genuine Early King plants at a new low price and hope you will let us reserve yours right away.

CUTHBERT—This is the leading late variety all over the country. The canes are very thrifty growers, upright in shape, light yellow in color and very hardy. The berries are large, deep red in color, oblong in shape, and firm enough to stand shipping in pint boxes. Very productive. However, it is the flavor of the Cuthbert that gives it distinction. It is sweet, rich and luscious and surpasses all others for home use and canning.

ST. REGIS EVERBEARING—The St. Regis succeeds upon all soils, whether light, sandy or heavy clay. In growth it is strong and stocky, with a great abundance of healthy, dark green foliage. Plants set in early spring will give a crop of fruit in the fall following. About the middle of August it commences to set fruit on the young canes and bears continuously until frost. The berries are large beautiful and attractive. They are bright crimson in color, of large size, with a rich, sugary raspberry flavor. The flesh is firm and meaty. A good shipper. Wonderfully productive, the first or main crop equal to any red variety known. The St. Regis Everbearing Red Raspberry is a money maker par excellence and we recommend it highly. We have a good, healthy, clean stock of these and we guarantee them to be the genuine St. Regis Everbearing.

Cumberland Raspberries

PURPLE VARIETIES

ROYAL PURPLE—A very productive and clean growing purple variety. Canes are practically free from thorns and bushes very healthy. Berries are large, seeds small and deeply imbedded in rich, juicy flesh. A heavy yielder. Fine for home use or market and unsurpassed for canning.

BLACK VARIETIES

CUMBERLAND—The most extensively grown variety of Black Caps. In this section they are planted almost exclusively for fruit and we ship ten times as many Cumberland plants as we do any other variety. The berries are immense in size, firm and extra productive. Fruit is jet black in color, giving it a beautiful appearance in the crate and is of excellent quality. Canes are hardy, strong and vigorous, and will withstand most severe winters unharmed. We guarantee our Cumberland to be first class and true to name. They are all freshly dug in the spring and are not storage stock.

GREGG—Gregg is by far the best late black raspberry grown today, and is well and favorably known in every fruit district. It is very productive of large berries of good quality.

PLUM FARMER—This is a good early variety that has lately become very popular. Berries ripen very early and most of the crop is produced in one week.

Early King Raspberries

BLACKBERRIES

ELDORADO—This is the finest blackberry grown. Its large size and delicious quality put it far in advance of other standard varieties. It is the hardiest blackberry under cultivation and will withstand the northern climate uninjured. It is very productive and has not failed to ripen a crop since its introduction, so we have confidence in recommending it as far superior to anything we know of on the market. It has been cultivated twenty years and under careful tests at the experiment stations has never winter killed or failed to produce a full crop of the finest fruit. The canes are very vigorous and hardy, enduring the winters of the far northwest without injury, and their yield of fruit is enormous. The berries are large, jet black, borne in large clusters and ripen well together. They are large, sweet, melting and pleasing to the taste, have no hard core and keep four or five days after picking with quality unimpaired.

MERSEREAU—Remarkably strong grower, upright, producing strong, stocky canes. A heavy producer of extra size berries which are brilliant black and retain their color under all conditions. Berries are extra quality, sweet, rich, melting and without core. Unsurpassed as a shipper and keeper. Canes are hardy and will withstand severe cold.

Eldorado Blackberries

CURRANTS

Currants are highly esteemed for jellies and preserves and bring very high prices in the market. They are hardy, bear readily and are economical of space.

LONDON MARKET—A particularly valuable variety for northern climates on account of its extreme hardiness, but will do equally well farther south. The plant is very vigorous, retains its foliage throughout the season and is not so liable to the attack of worms as many other kinds. The fruit is beautiful in color, large in size, of excellent quality, and a very heavy cropper. Ships well and is excellent for market either near or distant.

SPECIAL NOTICE

Owing to Federal restrictions we cannot ship Currant or Gooseberry plants into any states west of Minnesota, Iowa, Missouri, Arkansas and Louisiana.

Gooseberries

DOWNING—In our estimation the Downing is the best variety of gooseberry for general planting or for the garden and home use. The berry is yellowish green when ripe. It is one of the largest varieties and the bushes will produce more fruit than any other variety we have ever known. They should be planted in good rich ground for the best results.

Downing Gooseberries

Please note that out of 500 Concord Grape Vines from you I lost only two and out of 1,000 Cooper Strawberries I have not lost more than half a dozen.
—HARRY C. TWOMEY, Rock Island, Ill., May 27, 1925.

GRAPES

When you plant a vineyard you invest in something permanent. You will receive a regular yearly income from it as long as you live. Practically all the cultivation is done by horse power and very little hand work is required. Returns per acre are high considering the amount of labor required to produce a crop. Grapes are being planted extensively in all sections of the country and an ever expanding market creates a demand far ahead of the supply. Plant a vineyard of our Concord plants this spring and cash in on this opportunity for pleasant, profitable fruit growing.

CONCORD—The fine old popular market variety and the leading commercial grape of today. A large, purplish black grape, very hardy and productive. The bunches are large and well filled and vines vigorous, hardy and free from disease. Does well on any soil and is the biggest money maker in grapes. Is well and favorably known wherever grapes are sold and has an established reputation on the market. Is considered the standard by which grape prices are judged. We have a large stock of Concord in all grades this year and are offering them at bargain prices. These plants were all grown and graded under our personal supervision and we guarantee them to be exactly as represented and to be exceptional value at the price asked.

MOORES EARLY—Very large and round. Color black with a blue bloom. Quality very fine and sweeter than Concord. They stand handling and shipping and have an established reputation on the market. Vines hardy and productive. Ripens early.

NIAGARA—The standard white grape of the country. Grape large, slightly oval in shape, pale yellow in color with a white bloom. Quality of the best. Bunches are large and compact. Vines vigorous, hardy and productive. Ripens with the Concord.

WORDEN—Large, round grape, black in color. Flesh has a fine flavor unequalled by any other grape; delicious and melting; excellent for home use and a good market variety. Does not produce so heavily as the Concord so it is not planted so extensively for market. Vines are thrifty and hardy. Ripens with the Concord.

BRIGHTON—In our estimation the best all-round red grape. Bunches large, long and shouldered. Berries are medium size, skin thin, flesh very tender, sweet and best quality. Ripens early and is very productive and vigorous.

Concord Grapes

Asparagus

Asparagus is a good crop to have in the home garden and can be made to yield large profits when planted for commercial use. It grows like a weed and is almost impossible to kill. Set the plants in the ground so the crowns are three to four inches under the surface and give decent cultivation. Plants should be planted about ten inches apart in the row with rows any convenient distance apart.

WASHINGTON RUST RESISTANT—The new valuable rust resistant variety. Stalks extra large in size, purple color, very tender, crisp and extra fine flavored. Grows very fast and comes up thick in the rows, making it the most productive variety in existence. The heads stay very compact, solid and always bring a premium over other variety.

PALMETTO—Old standard variety and very popular. Stalks purple, medium size and very prolific. Season early and regular in growth.

Palmetto Asparagus

Rhubarb or Pieplant

Coming on so early, Rhubarb finds a ready market, being relished by everyone. The city garden should have a dozen or more hills and every farm can add to its income by raising Rhubarb. It is easily produced in a commercial way, yields immensely, can be shipped almost any distance, and is easily gathered and packed.

GIANT CRIMSON—Early, just before Asparagus; immense stalks, tender, delicious flavored; productive and continues long in use; the best variety for general use. Large, thrifty roots.

I received your card Monday and the plants came Tuesday. Have them all set out and they look fine.—Mrs. Alice Sines, Marion, Ohio, April 27, 1925.

Hardy Northern Grown Fruit Trees

We have selected an offering of the time-tried varieties of tree fruits. The trees are all healthy, thrifty stock, and quality and size have not been skimmed to make a price. If you do not find varieties you want, send us your list and we will quote special prices as we can furnish many varieties not listed below. Shipment will be made either from Bridgman or Northern Illinois nurseries.

Please do not order 1 or 2 trees

While we will fill orders for only 1 or 2 trees, we ask that when possible you make your tree order for at least 3 trees. We pack these trees in the best possible manner and it is expensive. We cannot make our "Each Price" high enough to cover this packing expense on orders for only 1 or 2 trees, so ask your kind consideration in ordering.

CHERRIES

EARLY RICHMOND (Sour)—Excellent for cooking. Medium size. Red, juicy, acid flavor. Hardy. One of the best.

MONTMORENCY (Sour)—Early, red, large, rich, acid. Heavy yielder.

NAPOLEON (Sweet)—Light lemon-yellow, with red cheek. Flesh firm, colorless. Best light sweet cherry.

BING (Sweet)—Very large, dark brown—almost black. Rich and delicious. Flesh firm and good shipper.

WHAT OTHERS SAY OF US

The plants you sent were fine, and in spite of the very dry weather most of them lived and are doing exceptionally well.—ALLEN G. HUGHES, Dexter, Mich., August 1, 1925.

I received a recent order from you and it was the finest I have ever bought.—W. E. HUTH, St. Clairsville, Ohio, April 30, 1925.

Stock I bought of you last year made a fine growth and will get a big crop this year. Well pleased with all the plants.—E. M. BRITTON, Monticello, Ind., March 9, 1925.

Bradshaw

HARDY NORTHERN GROWN APPLES

The apple is universally recognized as the most desirable fruit of the United States, because of its great varieties of delicious flavors, nutritious qualities and nutritive value.

Delicious Apple

SUMMER APPLES

DUCHESS OF OLDENBURG—The old-time favorite. Round, beautiful streak of red and yellow. Early. Fine flavor. Hardy.
RED ASTRACHAN—Earliest and best red apple. Good size, dark red. Vigorous, hardy and productive.

YELLOW TRANSPARENT—Fruit a clear yellowish-white. Begins to ripen in July. Especially hardy.

FALL APPLES

MAIDEN BLUSH—Old favorite. Strictly fall apple. Medium sized, smooth, beautifully blushed with red on creamy yellow.

WEALTHY—Old standby. Fine flavor, juicy red. Extra hardy.

WINTER APPLES

BALDWIN—Popular in north. Bright red, medium to large, firm, finest quality.

DELICIOUS—Grand champion of apples. Red with pin dots of yellow. Fine grain, crisp, juicy, sweet. Good keeper.

JONATHAN—Old reliable. Brilliant red, rich, fine acid flavor, hardy. Good market sort.

GRIMES GOLDEN—Large yellow, high quality, very rich, subacid pear flavor.

M'INTOSH RED—Large deep crimson. Flesh white and tender. Tree hardy and vigorous.

NORTHERN SPY—Large, pale yellow skin mottled with carmine. Firm, tender, crisp, juicy, sub-acid. Popular everywhere.

R. I. GREENING—Large; flesh yellowish, firm, fine grained, crisp. Fine cooking. Tree large and vigorous.

STAYMAN'S WINESAP—Dark rich red striped with crimson. Flesh tinged with yellow; firm, crisp, fine-grained, very juicy, sub-acid flavor. A good one.

PRICE OF APPLE TREES

| | Each | 10 | 100 |
|--|--------|--------|---------|
| Baldwin, Northern Spy, R. I. | | | |
| Greening, 2-yr., 4 to 6 ft. trees | \$0.55 | \$5.00 | \$45.00 |
| All other varieties, 2-yr., 4 to 6 ft. trees | .50 | 4.50 | 40.00 |

QUINCES

CHAMPION—Very young bearer. Fruit is large, oval; quality fine, good keeper.

ORANGE—We consider this the best variety. Large, roundish, of a bright golden yellow color; flesh firm and tough until cooked, when it becomes tender, juicy and of excellent flavor. Tree has rather slender shoots and oval leaves; very productive. This is the variety most extensively cultivated for the fruit. Ripens in October.

PRICES ALL VARIETIES

2-yr., 4 to 6 ft. trees, \$1.25 each, 10 for \$10.00, 100 for \$87.50.

PEACHES

ELBERTA—Free stone. Good all-around peach. Large. Skin lemon-yellow partly crimson. Hardy. One of the most widely planted varieties and very popular.

KALAMAZOO—A big money-maker. Midseason. Yellow; a heavy bearer.

LEMON FREE—Good late. Large size, yellow tinted red. Very productive and a good market variety.

ROCHESTER—First large, yellow free-stone peach to ripen. Finest flavor and good shipper.

PRICES OF PEACH TREES

|--|-------|--------|---------|
| All varieties, 1-yr. 4 to 6 ft. trees— | \$.45 | \$4.00 | \$35.00 |

Rochester

BEAUTIFUL ROSES

We are especially proud of our fine Rose stock this year. Every Rose Bush we ship is strictly 2-year No. 1 and you will find our prices very reasonable for this No. 1 grade. Just a word of caution—Do not be misled by others offering a 2-year Rose Bush at attractive prices as these are most always No. 1½ or No. 2 stock, a much inferior grade. If their stock is really No. 1 grade they usually do not hesitate to say so. The best is always the cheapest in the end.

Hardy Perpetual or June Roses

The Hybrid Perpetuals are the hardest of all bush roses, and require little care after once planted. Perhaps the most valuable of all hardy bushes for permanent planting, as they will succeed anywhere. We have listed below hardy, vigorous kinds, suitable for the far north.

La France

They thrive in all sections of the country and bloom profusely and regularly at the usual time. Although called perpetual, they are not normally everblooming with the exception of some varieties, notably General Jacqueminot and Paul Neyron, which with us have bloomed all summer long.

FRAU KARL DRUSCHKI (White American Beauty)—This is undoubtedly the greatest hardy pure white rose ever introduced. Makes splendid buds and immense flowers four to five inches across, perfectly double and delightfully fragrant. Large thick petals. Bright shining leaves, elegantly veined; a healthy, vigorous grower, entirely hardy and an abundant bloomer.

GENERAL JACQUEMINOT — Strong, vigorous grower, entirely hardy; an early and abundant bloomer. Buds and flowers are considered models of perfection. Its brilliant, shining crimson color is the standard by which other roses are judged. Unequaled in beauty of form and velvety richness. A real favorite.

PAUL NEYRON—One of the largest roses ever produced, sometimes measuring six inches across. In color it is a most beautiful clear rose-pink and possesses a delicious distinctive fragrance. Flowers are very double and full. Strong, upright grower, large leathery foliage, and a most abundant bloomer.

General Jacqueminot, a Real Favorite

J. B. CLARK—An intense deep scarlet-rose, shaded dark crimson. A wonderfully strong and upright grower. Exceedingly vigorous.

ULRICH BRUNNER—Makes immense blooms, almost as large as Paul Neyron. Flowers are full and of exquisite shape. Color, bright cherry red. Shell-shaped petals. Well known and popular.

EVERBLOOMING HYBRID TEA ROSES

This class is rapidly taking the foremost rank of roses for garden culture. They are the result of crossing Tea Roses with Hybrid Perpetuals, are perpetual bloomers all summer and fall, appear in the richest and varied colors, and are comparatively hardy. In the far northern states they should be given winter protection. Their beautiful and continued bloom throughout the summer will well repay the slight care needed to protect them through the winter.

ETOILE DE FRANCE (The Gold Medal Rose of France)—This rose has been selected from the unlimited num-

Mrs. Aaron Ward

ber of Tea Roses as the acme of perfection. A brilliant shade of rich, velvety crimson. Very striking. Flowers are extremely large, on long stiff stems, and buds are long and pointed.

GRUSS AN TEPLITZ—This grand Rose has proven one of the best and most valuable hardy crimson everblooming roses for garden planting ever introduced. The color is dark rich crimson, passing to velvety, fiery red, the very brightest colored rose we know. Flowers large, full, and sweet; blooms constantly, throwing up fresh buds and flowers the whole growing season.

KAISERIN AUGUSTA VICTORIA—An unsurpassed Rose of great beauty.

This exquisite variety still retains its place as the foremost and best white Tea Rose for general planting. It is perfectly hardy and produces continuously throughout the season, glorious, fully double flowers with a delicious Magnolia-like fragrance. Color is a most delicate, creamy white.

LA FRANCE—One of the most popular roses in cultivation. Both buds and flowers are of lovely form and grand size, exceedingly sweet; color peach blossom pink, elegantly clouded with rosy flesh.

Ulrich Brunner

Dorothy Perkins

buildings or for shade on porches or arbors. They are hardy everywhere and require very little attention to produce a profusion of blossoms.

CRIMSON RAMBLER—One of the best roses known today. Hardy as oak; withstands every climate; grows rapidly and blooms all season long. Double deep crimson flowers borne in large clusters. A plant under favorable conditions grows to a great height the first season.

DOROTHY PERKINS—The finest of all pink ramblers. Flowers perfectly double and borne in immense clusters. Color exquisite shell pink. Sweetly scented. Very hardy and grows from 10 to 15 feet in one season.

EXCELSA (Red Dorothy Perkins)—A splendid Climbing Rose, remarkable in many ways but particularly in the brilliant fiery red or intense crimson-scarlet flowers, which are double and borne in trusses of thirty to forty flowers. Hardy and free growing.

FLOWER OF FAIRFIELD—A very popular everblooming variety. Flowers are crimson in color, partially double, and bloom constantly throughout the summer. Very attractive.

MRS. AARON WARD—

Few roses attract so much attention as this beautiful variety. The flowers, which are of splendid form, full double, are equally attractive when in full bloom as in the bud stage. In color they are a distinct Indian yellow shading lighter towards the edges. Under certain weather conditions the entire flower will sometimes come a yellow tinted white, but it is beautiful under all color variations. A strong, vigorous, but compact grower.

MADAM CAROLINE TEST-OUT—

One of the most popular and valuable varieties. Flowers are very large and full. Color bright satiny rose with brighter center. Very free and fragrant.

HARDY CLIMBING ROSES

These roses are necessary for the home, giving it a touch of beauty and adding more to the attractiveness than any other ornamental plants. They may be used to screen undesirable views of

Excelsa or Red Dorothy Perkins

You may be interested to know that the Grape Vines you sent to my order last year were entirely satisfactory in every way. They made a fine growth of cane during the past season, and several of them grew canes exceeding 12 feet in length. (Note: These were 1-yr. No. 1 vines.)—F. V. PETTIT, Housatonic, Mass. Jan. 26, 1925.

Hardy Ornamental Shrubs

The planting of shrubs has become so popular in recent years that hardly a home is without some ornamental plantings. Aside from the beauty of their varied colored flowers and foliage, they add materially to the property value, often causing an increase of 10 to 20 per cent. Considering this valuable feature you cannot afford to neglect the planting of more shrubbery when a few dollars spent now will mean several hundred dollars in a few years' time, together with all the pleasure you will derive from their beauty.

Our shrubs are all first grade and mostly 18 to 24 inches in size, the most economical and satisfactory size for general planting. In the case of dwarf growing and hedging shrubs we are offering a smaller size. Our stock in all sizes is well branched and thrifty.

ALTHEA (Rose of Sharon)—Handsome late summer blooming shrubs, coming into bloom when few shrubs are in flower. It is beautiful, free blooming, clean and hardy. Large showy flowers. Valuable for hedges or single specimens. A hedge or planting of mixed colors is especially beautiful. Can furnish in white, pink, red or blue.

BARBERRY, JAPANESE—Not only an invaluable shrub where a low, compact hedge is wanted, but fits in admirably with other shrubs in every planting. Has handsome foliage of tiny bright green oval leaves that turn most brilliant shades of

Buddleia or Butterfly Bush

orange and red in the fall. The slender, graceful branches are thickly lined with attractive yellow blossoms followed by scarlet berries which hang throughout the winter. Especially valuable as a hedge for it needs no trimming. Has nothing to do with the White Pine Blister Rust which attacks wheat, and may be planted freely.

BUDDLEIA, BUTTERFLY BUSH —

This shrub of comparative recent introduction has grown into favor almost immediately. It is a semi-herbaceous plant, by which we mean in some latitudes it will die down to the ground during winter, and while perfectly hardy, we recommend covering the roots with manure, leaves, or other material as winter approaches, as it will help to produce a heavy growth the next season. It is very hardy; blooms the first season, usually from June until frost. The blossoms are borne on long, graceful stems, which terminate in tapering panicles of lilac-colored flowers that are of miniature size, the flower head frequently being ten inches long.

CORNUS, SIBERIAN DOGWOOD—A tall shrub with bright, coral-red branches, making it especially ornamental during the winter. Has abundant small white blossoms borne in early summer and followed by white fruit. Foliage is a bright green and very attractive. For best winter effect they should be planted in large groups but are attractive and very beautiful wherever planted.

Althea or Rose of Sharon

Deutzia

DEUTZIA (Pride of Rochester)—One of the most elegant shrubs ever introduced. An erect, vigorous grower; has a profusion of large showy flowers in May. Flowers are white, with back petals tinged with pink; very double. Grows 6 to 8 feet high.

FORSYTHIA INTERMEDIA (Golden Bell)—A handsome upright bush with deep green foliage turning to a purplish tint in the autumn. It is the first to greet the springtime with its shower of golden yellow trumpet shaped flowers that appear in advance of the leaves. One of the showiest shrubs.

HIGHBUSH CRANBERRY—Tall growing shrub adapted to shady locations. Foliage and manner of growth almost identical with common Snowball. Has white flowers followed by beautiful clusters of bright red berries from which it derives its name.

HYDRANGEA (Paniculata Grandiflora)—It beats the world; the fine dwarf growing Hydrangea. It is hardy, enduring the severest winters outdoors without protection, and is easily transplanted, not one in a thousand dying. Never fails to bloom the first year planted. The flowers are produced in mammoth trusses and when fully expanded are white in color, but later assume tones of rose and bronze on the exposed sides. Commence blooming in August and continue into the autumn. The shrub is attractive immediately after it is planted and continues gaining in beauty for ten to twenty years. Severe pruning in early spring insures large trusses.

HYDRANGEA ARBORESCENS (Hills of Snow)—A hardy bush that grows to a height of 6 to 8 feet. Begins to bloom in June and continues throughout August, bearing large trusses of pure dazzling white flowers. Very beautiful and desirable.

LILAC (Purple)—One of the best of the old-fashioned flowers. Blooms freely when once established and will grow anywhere. Bears dense panicles of purple flowers. The most fragrant of the Lilacs.

SNOWBALL — Handsome native shrub, attaining 8 to 10 feet in height, with rather smooth, light gray branches and stems. The pure white flowers appear in May and June, followed by decorative fruits, which begin to color by the end of July and remain on the branches and keep its bright scarlet color until the following spring. The berries are not eaten by birds. A well known old favorite and one of the most popular shrubs on the market. Hardy everywhere. You will want some of these hardy plants in your yard next summer to enjoy.

PRIVET, AMOOR RIVER NORTH—Very hardy. Has dark green leaves which persist almost through the winter. Where a stiff, upright hedge is wanted nothing surpasses the Amoor. To add to its attractiveness in foliage it bears erect panicles of beautiful white flowers in June, followed by black berries. The privet has been called a living fence, for one made of plants that are covered with bright green foliage, pretty flowers, or bright berries in winter, is so much more pleasing than the still, rigid, mechanical effect obtained by the similar use of wood or metal, and it will not rust out or rot down, but year after year increase in beauty and value.

Hydrangea Paniculata Grandiflora

Spirea Van Houttei

SNOWBERRY (White) — A perfectly hardy shrub from 2 to 3 feet high, excellent for massing in the lower parts of a bed or border. The pinkish white flowers appear in loose racemes in July and August, followed by clusters of wax-like milk-white berries that remain on the branches until winter.

SNOWBERRY (Red) (Coral Berry) — Very similar to white except that its berries are red.

SPIREA, ANTHONY WATERER — A very compact, round bush, dwarf growing

shrub which attains a height of 18 to 24 inches. Has rose red flowers in large clusters all over the bush and blooms from May to September. Perfectly hardy and fine for low clumps. Dark green foliage.

SPIREA, VAN HOUTTEI (Bridal Wreath) — A well known Spirea, and a beautiful ornament for the lawn at any season, but when in flower it is a complete fountain of white bloom, the foliage hardly showing. It is of a drooping habit, reaching a height of 6 to 8 feet when matured, producing a profusion of white flowers in June. The Spirea is very often used for hedge fencing where its luxuriant growth and flowering qualities are very desirable. The most useful of all shrubs and planted by everyone.

SYRINGA (Mock Orange) — A hardy, free flowering shrub with the most showy, fragrant, white flowers. Grows 8 to 10 feet high with spreading and often arching branches. Blossoms in spring and flowers are especially fragrant.

WEIGELA, ROSEA — The most popular of all the Weigelas. Foliage is a deep green and bush is a vigorous grower. Flowers are a bright rose color, appearing in greatest abundance in June, and more sparsely at intervals throughout the summer. Oftimes blossoms so profusely as to completely cover the bush.

Dahlias

The Dahlia is again becoming one of the most popular of bedding plants. Their great beauty and ease of culture make them one of the most satisfactory flowers to grow. They will thrive in any soil that will raise potatoes and should be planted the very last of April or first of May, according to location, placing the bulbs about six inches in the ground. We have personally selected the following list of varieties from a large number when in full bloom and we know you will find them especially beautiful.

AMERICAN BEAUTY (Hybrid Show) — The flowers are of gigantic size and are produced on long, heavy stems, well above the foliage. The color of this valuable acquisition is a gorgeous wine-crimson. Price, each, 25c; 6 for \$1.10; dozen, \$2.00.

HENRY GLASSCOCK (Show) — Deep lilac, striped purple. The nearest to a blue you will find in a Dahlia. Price, each, 35c; 6 for \$1.55; doz., \$3.00.

JACK ROSE (Decorative) — The identical shade of the General Jacqueminot Rose from which it derives its name. Free-flowing. Price, each, 25c; 6 for \$1.10; doz., \$2.00.

MARJORIE CASTLETON (Cactus) —

American Beauty

The outer florets are pleasing shade of rose-pink, while the tips and central florets are cream-white. In shape the flower greatly resembles an Aster. Price, each, 25c; 6 for \$1.10; doz., \$2.00.

MAUD ADAMS (Show) — Ideal new Show Dahlia. The color is a pure snowy white, very effectively overlaid clear delicate pink. Price, each, 35c; 6 for \$1.55; doz., \$3.00.

MISS HELEN HOLLIS (Show)—Gigantic Scarlet Show Dahlia. Color deep scarlet. Blossoms are on long, stiff stems, well above foliage. Price, each, 35c; 6 for \$1.55; doz., \$3.00.

OREGON BEAUTY (Decorative)—Outstanding new decorative sort which is a real beauty and a giant. Long stiff stems and a ball-shaped bloom with a wonderful brilliancy. Color is intense oriental red, suffused with garnet, a golden sheen over all. Price, each, 25c; 6 for \$1.10; doz., \$2.00.

QUEEN EMMA (Peony-flowered) — Charming shade of holly-hock pink. Inner petals banded with bold. On very good stems. Well above the foliage. Price, each, 25c; 6 for \$1.10; doz., \$2.00.

Cannas

Cannas are fine for decorative effect on the lawn. They are tropical looking, and the rank green foliage and gay flowers make a brilliant sight. Plant about six inches deep in rich, moist soil when weather is warm and settled.

HUNGARIA—The best pink canna. 3½ feet. Very compact, almost dwarf and of a very luxuriant growth. Leaves bluish green, never burn. Trusses of enormous size borne well above the foliage. Flowers very large, with immense petals. Color purest pink, with satin sheen. Price, each, 25c; 6 for \$1.30; doz., \$2.50.

KING HUMBERT—4 feet. In this grand Italian canna we have a combination of the highest type of flower with the finest bronze foliage. Its flowers, which under ordinary cultivation will measure six inches in diameter and which are produced in heavy trusses of gigantic size, are of a brilliant orange-scarlet, with bright red markings, while the foliage is broad and massive and of a rich, coppery bronze with brownish green markings. Price, each, 15c; 6 for 80c; doz., \$1.50.

SUPERB—5 to 6 feet. Clean bright orange-scarlet flowers of good size. Beautiful bronze foliage and free grower. Price, each, 15c; 6 for 80c; doz., \$1.50.

THE PRESIDENT—4 feet. In color a rich glowing scarlet and the immense rounded flowers show niches across when fully open are produced on strong erect stalks well above the large green foliage. Free bloomer and strong grower. Price, each, 16c; 6 for 85c; doz., \$1.60.

WINTERS COLOSSAL—5 feet. Green foliage. Without doubt the largest-flowered Canna to date, as the average flowers almost cover a man's hat. The color is a strikingly vivid scarlet that retains its brilliancy. Price, each, 16c; 6 for 85c; doz., \$1.60.

YELLOW KING HUMBERT—4 feet. A sport of the most popular of all Cannas, King Humbert. Has the same habit of growth as its parent; foliage a very dark green, with flowers measuring 5 to 7 in. across. Color of flowers a deep rich yellow, softly spotted and blotched with bright red. Some plants will occasionally give a scarlet or

ROBIN ADAIR (Show)—Terra-cotta color. Very free bloomer. Exceptionally showy and attractive. Price, each, 25c; 6 for \$1.10; dozen, \$2.00.

STERN (Cactus)—Bright primrose-yellow. The flowers are large; petals long and pointed. One of the most satisfactory cactus varieties. Price, each, 25c; 6 for \$1.10; dozen, \$2.00.

STORM KING (Show)—Color, a pure white. Flowers produced on good stems, well above the foliage. Free flowering and beautiful. Price, each, 25c; 6 for \$1.10; dozen, \$2.00.

STRADELIA (Show)—Beautiful deep purple-crimson. Exceptionally free-flowering. The stems are long and wiry. Price each, 25c; 6 for \$1.10; dozen, \$2.00.

The President Canna

scarlet striped flower, which we consider an improvement rather than a defect. Price, each, 16c; 6 for 85c; doz., \$1.60.

Special Canna Bed Collections

If you prefer, we will make a selection of varieties for you for a complete Canna Bed and will choose varieties that will match up well in foliage, bloom and height. We will furnish these beds in following sizes at the attractive prices quoted.

FIVE FOOT BED—13 bulbs as follows: 4 tall for center and 9 medium for outside. Special price, \$1.50.

SEVEN FOOT BED—19 bulbs as follows: 1 tall for center, 6 medium for second circle, and 12 for outside of bed. Special price, \$2.00.

TEN FOOT BED—37 bulbs as follows: 1 tall for center, 6 medium height for second circle, 12 for next circle, and 18 shorter for outside circle. Special price, \$3.75.

GENERAL INFORMATION

TIME TO ORDER:—Early. Make up your order and send to us as soon as you receive this catalogue. You may then rest assured that your plants will be delivered when you are ready for them. Use blank order sheet which is provided, being careful to fill all blanks properly and WRITE PLAINLY. Always keep a copy of your order for your own reference. We acknowledge receipt of your order promptly.

TERMS:—Our terms are cash with order or part cash and the balance any time before shipment is to be made. Orders amounting to \$5.00 or more we will ship C. O. D., providing 25 per cent of the total is remitted with order. Remit by personal check, Express or Postoffice Money Order, Bank Draft, or Registered Letter.

REFERENCES:—For information as to our reliability we refer you to Farmers and Merchants National Bank, Benton Harbor, Michigan, or Bridgman State Bank, Bridgman, Michigan. Also the Postmaster or Express Agent at Bridgman.

SHIPPING SEASON:—We begin shipping the last of March or first of April according to season, and continue until about May 15th. We do not advise our customers to order stock shipped after this date.

METHODS OF SHIPPING:—For most orders express is the safest and all things considered, the best way to have your plants shipped. All express orders are shipped charges collect. Many of our small orders are now shipped by Parcel Post and arrive in good shape. We do not recommend it for any but small orders, however, as it is very expensive on large shipments.

Inquire from your Postmaster or Rural Carrier what zone you are in from Bridgman, Michigan. By referring to the following table you may then determine the amount of money you must add to your order if you wish it forwarded by Parcel Post. These amounts include the safe wrapping of your order to reach you in good growing condition.

| Add to your order for each 100 plants of: | 1st & 2nd Zone | 3rd Zone | 4th Zone | 5th Zone | 6th Zone | 7th Zone | 8th Zone |
|---|---|-------------|-------------|-------------|-------------|-------------|-------------|
| Strawberries and Asparagus ----- | \$0.10 | \$0.15 | \$0.20 | \$0.25 | \$0.30 | \$0.35 | \$0.40 |
| Red Raspberries ----- | .12 | .18 | .25 | .35 | .40 | .48 | .55 |
| Black Raspberries and Blackberries ----- | .20 | .30 | .40 | .65 | .85 | 1.05 | 1.25 |
| Currants, Gooseberries, Grapes, Rhubarb, Roses ----- | Every 12 plants same rate as 100 strawberries | | | | | | |
| All Ornamental Shrubs ----- | Every 6 plants same rate as 100 strawberries | | | | | | |
| All Bulbs ----- | 12 bulbs or less, one-half rate of 100 strawberries | | | | | | |
| Fruit Trees are too large to be shipped by mail. | | | | | | | |

This table has been carefully prepared and after filling thousands of orders, and we believe it to be as correct as it is possible to get it. Plants do not all weigh the same when packed for shipment and no table could prove correct. We do not try to adjust small differences in postage.

GLADIOLI

Gladioli do their very best in a rich, sandy loam, but they will thrive in most any soil except very stiff clay. Bulbs should be planted during April or May. In setting the rule is to plant each bulb at least three times the depth of its diameter, the pointed side of the bulb, of course, should always be up.

AMERICA—Exquisite soft lavender pink. No other like it. Most popular pink in the world. Price, each, 8c; dozen, 50c.

BARON J. HULOT—Dark rich velvety purple. Straight spikes; good size. The leading purple variety. Price, each, 15c; dozen, 90c.

EMPRESS OF INDIA—Rich, dark mahogany red; uniquely veined. Small white dash in the throat around which color is lighter. Blooms very early. Price, each, 15c; dozen, 90c.

HALLEY—One of the earliest bloomers. Beautiful salmon pink with a creamy blotch and dark red stripes. Price, each, 8c; dozen, 50c.

MRS. FRANCES KING—Brilliant vermilion - scarlet. Most popular and effective variety for all occasions. Extra long spikes and well-expanded flowers. Price, each, 8c; dozen, 50c.

MRS. FRANK PENDLETON—Flushed salmon-pink, with rich maroon blotch on the three lower petals. The most popular flower in florists' shops. Price, each, 8c; doz., 50c.

NIAGARA—A delightful cream shade, blending to canary-yellow, splashed with carmine. Price, each, 10c; dozen, 60c.

ORANGE GLORY—Bright orange, with slight purple and white markings in throat. Most attractive. Price, each, 18c; dozen, \$1.50.

PEACE—Very large, nearly white, with pale violet feathering on lower petals; flowers correctly placed on a tall, graceful spike. A wonderful flower that will be a credit to your collection and a source of much pleasure when in bloom. Price, each, 10c; dozen, 60c.

RUBY KING—Intense dark, ruby-red. Blooms quite early. Large flower heads and beautiful blossoms make this one of the best. Very popular. Price, each, 12c; dozen, 75c.

SCHWABEN—Best yellow. Golden yellow; center blotched with brilliant brownish carmine. Opens six to eight at a time. This variety has developed into a real favorite and those who want a yellow Gladioli can make no mistake in ordering some of the Schwaben. Price, each, 10c; dozen, 60c.

WAR—Giant; deep blood-red shaded crimson-black. Very large showy flowers. A leader among the large reds. Price, each, 15c; dozen, \$1.25.

Mrs. Frank Pendleton

CANNAS and DAHLIAS

KING HUMBERT

This well known and popular Canna grows to a height of four feet and is a combination of the highest type of flower with a bronze foliage that cannot be surpassed in any other variety. Its flowers, which under ordinary cultivation will measure six inches in diameter and which are produced in heavy trusses of gigantic size, are of a brilliant orange-scarlet, with bright red markings, while the foliage is broad and massive. Price, each, 15c; 6 for 80c; dozen, \$1.50.

KING HUMBERT

JACK ROSE DAHLIA

A show dahlia with the identical shade of the General Jacqueminot Rose from which it derives its name. This free-flowering dahlia is one of our best sellers, due to the fact that its flowers are large, well formed and present a wonderful sight when the plant is in full bloom. Flowers cut from Jack Rose will last a long time when used in bouquets or for house decorations. (See pages 17 and 18 for other varieties.) Price, each, 25c; 6 for \$1.10; dozen, \$2.00.

HENRY GLASSCOCK

HENRY GLASSCOCK DAHLIA

A Show Dahlia that will do credit to any collection, regardless of its size. The flowers are a deep lilac, striped purple and are the nearest to a blue you will find in this flower. When the plant is in full bloom there is nothing that can compare with its beauty, the flowers presenting a perfect form which are borne erect on stiff stems. We selected the Henry Glasscock because in our estimation it is one of the wonders of this popular flower, although there are others equally as good which we are listing on pages 17 and 18. Don't fail to give Henry Glasscock a trial, as it will be a great surprise to you next summer and fall. Price, each, 35c; 6 for \$1.55; dozen, \$3.00.
